

ATF Exchanger

ZC-QC009D

Cleans and changes the fluid in the gear box, solves the problem of incomplete replacement when manually changing the transmission oil.

Fully automatic identification of oil inlet and outlet direction

High- precision electronic flow meter detection

Fully automated replacement of new and old oil

Automatic transmission cycle cleaning

Automatic filling

Automatically reduce the automatic transmission oil

Visual display of transmission radiator oil pressure

The latest "standard oil quantity of each model" database

Regular maintenance

New and old oil temperature display

Electronic scale one- key clear

Technical Specifications:

Display: 10 inch touch screen

Ambient temperature: -10~+40°C

Equal exchange error: $\pm 0.01L$

Relative humidity: < 85%

Voltage: DC12V

Maximum power: 150W

Oil pipe: 2.3 m

Oil return pipe: 2.3 m

Oil drain pipe: 1.5m

Oil tank: 20L \times 2

Language: Chinese, English, German, Spanish
