

## **ATF Exchanger Model: ZC-QC009D**

### Features:

- a. Cleans and changes the fluid in the gear box, solves the problem of incomplete replacement when manually changing the transmission oil.
- b. Fully automatic identification of oil inlet and outlet direction
- c. High- precision electronic flowmeter detection
- d. Fully automated replacement of new and old oil
- e. Automatic transmission cycle cleaning
- f. Automatic filling
- g. Automatically reduce the automatic transmission oil
- h. Visual display of transmission radiator oil pressure
- i. The latest "standard oil quantity of each model" database
- j. Regular maintenance
- k. New and old oil temperature display
- l. Electronic scale one- key clear

## Specification:

Display	10 inch touch screen
Ambient temperature	-10~+40°C
Equal exchange error	±0.01L
Relative humidity	< 85%
Voltage	DC12V
Maximum power	150W
Oil pipe	2.3 m
Oil return pipe	2.3 m
Oil drain pipe	1.5m
Oil tank	20L × 2
Language	Chinese, English, German, Spanish
