

Dent Removal Machine (Electric Operated)

Model: ZC-QC080D

Features:

- a. This device is designed specifically to be used with dents on flexible steel car bodies, dents like the kind caused by impact from hailstones, which leave smooth, rounded dents, can be removed.
- b. Equipped with digital screen and relative control for both heating time and power settings.

Specification:

Input frequency	50 Hz
Welding thickness	0.6-1.2 mm, Small welding traces.
Welding gun	2
Welding modes	6 welding modes
Output	Carbon rod
Heating AC	3v-5v
Melting AC	1v-7v
Welding AC	1v-7v
Input power	1.8kw
Input current	22A
Voltage	220v
Power output cable	1.5 m
Insulation class	F
Accessories	1x carbon hammer, 1x Hook hammer, 1x manual sucker, 2x carbon rod, 10x Triangle straight pull sheet, 1x spanner for wrench, 1x Hist, 1x manual with box
