

Diesel Smoke Tester Model: ZC-QC024D

Specification:

Portable integrated structure design	
The smoke can be measured by the split sampling technology, the acceleration, deceleration and steady speed of the diesel engine	
High brightness digital display	
Protect the optical system from contamination with ?air curtain? technology	
Automatic constant temperature control of the detection room can prevent condensation and affect test accuracy	
Measurement range opacity N	0 to 100% (equivalent smoke value 0 to 10FSN)
Indication error $\leq \pm 2\%$ (measured value)	
Stability Automatic zero calibration, moment drift $\leq \pm 1\%/4h$	
Repeatability repeat error $\leq \pm 1\%$	
Power source	220~230V AC, 50Hz, 1 Phase
