

## Brake Fluid Tester

ZC-QC026D

- Immerse the probe into brake fluid and you will get different colors of LED lights, they indicate:
- Green Light: indicates the brake fluid water content is below 1%
- The First Yellow Light: indicates the brake fluid water content is approximately 1.5%
- The Second Yellow Light: indicates the brake fluid water content is approximately 2.5%
- The First Red Light: indicates the brake fluid water content is approximately 3%
- The Second Red Light: indicates the brake fluid water content is more than 4%
- After inserting the battery, press POWER button to turn on the tester, all LEDs lights turn on with buzzer sounding, which indicates the product self-test is successful
